

# PAYMENT OPTIONS

You can pay for short-term parking using six different methods.

1. Automatic camera parking through a third-party app

(Easypark or Parkman): If you use this option your parking will start automatically in the background and finish when you drive out. You can activate this option for your next parking in the app.

2. Manual camera parking through a third-party app (EasyPark or Parkman): You can activate your parking through a third-party app (EasyPark or Parkman) during your parking session. Your parking will start when you drive in and finish automatically when you drive out. It is no longer possible to start parking manually after driving out.

3. Payment using a traditional paypoint before driving out, only card payments.

4. Parking payment within 48 hours: You can pay for your parking on our website [www.hietalahdenpysakointi.fi](http://www.hietalahdenpysakointi.fi) within 48 hours of finishing your parking session.

6. Invoice payment: If your parking session has not been paid through one of the above payment methods our partner will send an invoice to the owner of the vehicle by post. A €7 invoicing charge will be added.
